EDUCATION

The Pennsylvania State University — **University Park, PA**
College of Engineering | Bachelor of Science in Computational Data Science — *Class of May 2026*
College of Engineering | Minor in Engineering Leadership Development — GPA: 3.6

PROFESSIONAL EXPERIENCE

Coca-Cola Bottlers Japan Inc — **Tokyo, Japan**
Data Engineer Intern — *May 2025 - Aug 2025*
- Built Medallion-architecture ELT pipelines that transformed raw financial data into multi-year OPEX reports used in budget planning
- Developed interactive BI dashboards comparing actuals, budgets, and prior-year performance, reducing manual reporting by 40+ hours per month
- Provisioned and validated Azure resources for a new subscription, supporting company-wide cloud governance migration

Coca-Cola Bottlers Japan Inc — **Tokyo, Japan**
Data Enablement Intern — *May 2024 - Aug 2024*
- Automated a Python-based internal notification system using Azure Logic Apps and Synapse, delivering personalized alerts to 200+ employees
- Implemented CI/CD improvements that reduced pipeline runtimes by 10% and stabilized deployments
- Documented data lifecycle and governance standards used by BI and analytics teams

The Daily Collegian — **University Park, PA**
Data Analyst — *Sep 2023 – May 2024*
- Boosted marketing efficiency by 30% by automating real-time data retrieval using the Facebook API
- Streamlined data aggregation and storage processes, enhancing consistency and reliability
- Facilitated cross functional team collaboration by following the SDLC methodology using Git

Penn State Campus Recreation — **University Park, PA**
Building Supervisor — *Jun 2023 - Present*
- Led daily operations for high-traffic recreation facilities, ensuring safety compliance and service quality
- Trained and scheduled facility staff, managing performance and resolving operational issues in real time

INVOLVEMENTS

Nittany Artificial Intelligence Student Society — **University Park, PA**
Machine Learning Bootcamp Certificate Candidate — *Jan 2024 - Present*
- Engaged in hands-on projects focused on white box models, neural networks, and regression techniques, culminating in a certificate of achievement

PROJECTS

ProfitOptima | Node.js, Firebase, Open AI API, Puppeteer, ML, Tavily API — *Nov 2025 – Present*
- Built an AI-driven pricing platform that generates real-time product price recommendations to improve margins
- Designed a modular scraping and pricing pipeline with fault-tolerant retries and scheduled execution
- Integrated external data sources using Puppeteer and Tavily to support dynamic market analysis

Viral Story Bot | Python, Reddit API, Open AI API, ElevenLabs API, Pexels API, TikTok — *Oct 2024 - Oct 2024*
- Engineered an end-to-end automation pipeline that scrapes Reddit, generates scripts, produces videos, and uploads to TikTok
- Achieved 1,000+ views per video with zero manual editing through fully automated content generation

KnightMind | *Pygame, Adversarial Search Algorithms, Evaluation Function Design, Git* — *Jan 2024 - Nov 2024*
- Developed chess engine using adversarial search and custom evaluation functions to select optimal moves
- Achieved 94%-win rate against standard AI opponents through optimized board evaluation

HONORS/SKILLS

Certifications: Azure Data Fundamentals-900 (Microsoft - June 2024), Azure Fundamentals (900, Microsoft - July 2024)
Languages: English (Native), Japanese (fluent), Hindi (fluent)
Technical Languages: Java, JavaScript, Python, TypeScript, R, CSS, HTML
Frameworks and Tools: Flask, NumPy, PostgreSQL, PySpark, React.js, RESTful APIs, Docker, MERN Stack
Interests: Bodybuilding, Movies, Cooking, Anime, Reading, Guitar
